PHOTO INTELLIGENCE MEMORANDUM

Veterinary Institutes, Leningrad, USSR

25X1

25X1

This memorandum reports the completion of a request by []
[] OSI/Med. for information concerning two veterinary institutes in Leningrad.

This was a "crash" project and we had only one day to satisfy his request.

25X1

[] gave us the information that there is a Veterinary Institute located at No. 5 Chernagovskaya Ulitsa and a School for the Advancement of Veterinarians located at No. 15 Mokhovaya Ulitsa. His request was that we pin-point on aerial photographs the exact location of these establishments. According to the requester, the possibility exists that ground photographs may be taken and/or surveillance of these buildings may be undertaken if their approximate location could be determined.

Optimum stereo coverage of Leningrad was obtained for us by OCD/GR. By careful study of a Guide-Book to the Soviet Union obtained from the C.I.A. Library, the streets were located and street numbering system established so that the desired Institutes could be very accurately pin-pointed.

The requester was given a copy of the AOF Target Mosaic of Leningrad with the location of the desired Institutes circled in red pencil. He was very gratified with our results. He was informed that D/GP was already over-taxed with high-priority projects, but if he wanted large-scale photographic enlargements of the buildings they could be obtained from OCD/GR.
